Anti-fingerprint stainless steel

BENEFITS

Add steam for crispier baking

The SteamBake button in this oven adds steam at the beginning of the baking process. The steam cooking keeps the dough moist on the surface to create a golden colour and tasty crust, while the centre stays soft and tender. In addition to baking crispy and tasty breads, muffins and pies - your roast chicken, grilled meats and lasagne will get equally delicious cooking results.

MaxiView™ Enlarged Window

The enlarged window on the door is 20% larger than previous models, so now you can see exactly what's happening throughout the entire cooking process.

ThermiCAir™

The ThermiCAir™ circulates hot air evenly throughout the interior, heating up the oven faster and reducing cooking temperatures by up to 20%, saving you both time and energy.

Multi-function Oven

This multi-function oven offers both fan forced and conventional cooking options, so you can get the best results from whatever you're cooking.
