

Opal Sole

CORNER WALL BASIN INSTALLATION INSTRUCTIONS PLEASE READ CAREFULLY BEFORE INSTALLATION

IMPORTANT

Provide suitable reinforcement behind finished wall for the basin D200 and D201 fixings at the fixing height position.

Roughing in for D.200 and D.201 Fixing Kit:

For timber stud walls, noggins and studs must be positioned at a height to allow for the location of fasteners as detailed in **Fig. 3**.

BASIN INSTALLATION

- 1- Mark the four fixing screw hole positions on finished wall at the recommended height as detailed in **Fig. 3**.
- 2- Drill four Ø12mm holes in masonry wall for expansion fasteners. For timber stud walls drill four Ø8mm holes for Fixing Screws.
- 3- Insert expansion fasteners into the drilled holes in masonry wall. Screw D200 fixing screws into one side of the wall using the flats located on the screws section of the stud and spanner as shown in **Fig. 2**. Allow 48mm of thread to protrude from the finished wall.
- 4- Locate basin onto the Fixing Screws on the wall. Insert plastic bushes, metal washers and fasten to wall with fixing nut, as detailed in **Fig. 2**.
- 5- Put plastic bush onto the D201 fixing screws and screw through basin into finished wall, as detailed in **Fig. 4**.
- 6- The Plastic Bush allows for leveling adjustment if required by rotating the hexagonal head bush, the basin will be slightly raised or lowered.
- 7- Fit taps and waste assembly to the basin.
- 8- Tighten fixing nuts and connect plumbing to complete the installation.
