| <b>Care and Maintenance:</b>      | Marble is a natural stone and must be cleaned with care. First remove dust from the surface using a soft dry cloth. Using a damp cloth and water-based cleaner or mild soap diluted in warm water, wipe down the entire marble counter. Marble is prone to water spots so always dry immediately when wet. |
| <b>Installation Instructions:</b> | Suitable for wall plumbing installation only. It is recommended to apply a sealant on the marble upon installation.                                                                                                                                                                                        |
